

Removed. The hangars are currently being manufactured by R&M Steel in Idaho. I do not have a date for delivery.

Again this year we will be doing a marking project as the FAA Safety Inspector feels that it should be done each year. Coupled with this project is the replacement of the chain link fencing at the north part of the airport. This fence is more than 20 years old and is only 6 feet high. Several issues with it were identified by the FAA Safety Inspector

DISCUSSION

One of the brooms should be shipped next week with the second the week after. These brooms are

funded with discretionary money from FAA. Both Senator Collins and United worked very diligently to convince the FAA

that these two brooms were essential to improving the Safety and reliability at PQI. Senator Collins office is also taking the lead in working with FAA to get funding for a Low Ground Pressure Bulldozer. This bulldozer is necessary to clear in front of the localizer, maintain and enhance the perimeter fencing and clean our drainage ditches.

AIRPORT CURRENT EVENTS SCOTT

Discussion United on March 5th changed the schedule for the morning departure out of Newark to PQI
 The departure out of Newark is now at 10:30 AM arriving into PQI at 12:38 PM. This allows 9 of the top ten markets to
 Connect. In addition over 50 markets in the Eastern Time Zone served by United are able to use this connection. This
 should eliminate the need to use the late night flight. Also we had an FAA Surveillance Inspection which we passed with
 flying colors
